**microSYSTEM**

## ECO-FRIENDLY DESIGN

The micro**SYSTEM**<sup>®</sup> line of products is not only easy on the pocket book (with a starting price in the teens) it is also easy on the environment. The efficient layout of the buildings provides maximum usability and flexibility with minimal material and energy consumption as well as site disturbance. Throughout the system environmentally-friendly products are utilized. From the installation of low-energy fixtures and self-contained composting toilets to a material palette including cement-fiber siding, plastic-composite trim, and bamboo flooring, the micro**SYSTEM**<sup>®</sup> is a model of sustainable design and construction.

## DIVERSE APPLICATIONS

The micro**SYSTEM**<sup>®</sup> line of architectural products provides a low-cost, intelligent solution to a range of differing needs. Consisting of modular 8ft by 12ft living units, customizable interior options, and a choice of porch styles, the micro**SYSTEM**<sup>®</sup> can create a 100sf storage/garden shed, small office/studio, guest house/cabana, or complete residence. With the addition of connecting porch modules, different units can be linked together to provide a sheltered boardwalk corridor from one building to the next.

## CUSTOMIZABLE LAYOUT

Each building within the micro**SYSTEM**<sup>®</sup> line can be ordered bare or can be fully equipped with a kitchenette including sink, stove, refrigerator, and storage as well as a private bathroom with a pass-thru shower and toilet. Other options include a folding table/desk and chairs, a sofa that converts to a full-size bed with built-in storage, a drop-down twin-size bunk bed, entertainment center and a variety of different storage layouts. While we provide options for critical built-ins such as these we also leave you the flexibility to add your own touches. Each building is unique and custom designed by you.

### FREE DELIVERY & INSTALLATION

Leading the prefab industry, our free delivery and set up service is a critical aspect of the microSYSTEM® philosophy. No matter where you live within the contiguous United States you pay the same low price for your microSYSTEM® building. There are no hidden costs or additional fees. Contact us to find out more about this industry first.

### TOURS

We invite you to come and take a tour of a demonstration model on display at our production facility in southern Illinois. Tours are by appointment only so, if interested, please email us at [microsystemtours@m-finity.com](mailto:microsystemtours@m-finity.com).
